REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: In the Final Rejection Office Action mailed on 24 June 2005 the Examiner stated: "Claims 34, 38, and 42 are objected to as being dependent upon a rejected base claims, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims." In the "Response to Advisory Action" filed on 21 October 2005, the Applicants cancelled all previous claims and presented new claims 49-59. New claim 49 corresponded to a combination of previous claims 46, 31, 32, 33, and 34, new claims 50-55 corresponded to previous claims 10-15, respectively, new claim 56 corresponded to previous claim 19, new claim 57, corresponded to previous claim 20, new claim 58, corresponded to a combination of previous claims 47, 35, 36, 37, and 38, and new claim 59, corresponded to a combination of previous claims 48, 39, 40, 41, and 42. The Examiner concluded that these new claims meet the conditions of the claim objection in the Final Rejection Office Action.

5. The Examiner finds Applicants' amendments on pages 2-11 of the "Response to Advisory Action" filed on 21 October 2005 and the remarks on page 12 of the "Response to Advisory Action" concerning a file management apparatus for managing files stored therein persuasive as applied to claims 49, 58, and 59. The combination of prior art from Miike et al. (U.S. Patent No. 5,787,414), Hisatomi et al. (U.S. Patent No. 6,546,192), and Herz (U.S. Patent No. 6,460,036) does not anticipate or render obvious amended independent claims 49, 58, and 59. In particular, Miike, Hisatomi, and Herz do not teach the limitation "the position write unit, recognizing the

two pieces of data as two different segments, generates two segment names for identifying the two segments, and writes into the position information storage unit (i) the two segment names and (ii) the two pieces of information as entries that respectively correspond to the two segment names, the two pieces of position information indicating storage positions of the two segments, respectively."
